# servicenow | User Journey Map – Automated Network Request Management in ServiceNow

Based on user interviews and analysis

**Primary User**
Employee / IT User (End User)

**About the User**
- Needs to request network services (VPN, firewall, IP, connectivity, etc.).
- Wants a simple and fast process with clear status updates.
- Expects timely approvals and resolution.

**Goal**
Submit and track network requests efficiently through ServiceNow, with minimal manual effort.

**SCENARIO**
Requesting a network service (e.g., VPN access, firewall change, IP request, or connectivity).

| | Entice | Enter | Engage | Exit | Extend |
|---|---|---|---|---|---|
| | How does the user initially become aware of the network request process? | What do people do as they begin the process? | In the core moments of the process, what happens? | What do people typically experience as the process finishes? | What happens after the experience is over? |
| **Steps** | **Discover**<br>Learns about network request capabilities through ServiceNow portal, internal communication or IT support. | **Open Service Catalog**<br>Logs in to ServiceNow portal and opens the Network service from the Service Catalog. | **Submit Request**<br>Fills in the request form with details like device, requested type, access level, business justification and related configuration items. | **Automated Processing**<br>Request is categorized, prioritized and assigned to the appropriate support group. | **Approval & Fulfillment**<br>Gets approval (if required), and the IT team or network team processes the request. | **Receive Update**<br>Gets notifications about status changes, escalation and closure. | **Close Request**<br>Confirms the request is completed and provides feedback (optional). | **Track & Reuse**<br>Views history, downloads reports or raises similar requests in the future. |
| **Touchpoints / Systems** | **ServiceNow Portal**<br>(Website / Intranet) | **ServiceNow Service Catalog**<br>(Items / UI) | **ServiceNow Workflows**<br>(Assignment Rules, Approvals, SLA, Notifications) | **Email / In-App Notifications**<br>(ServiceNow) | **ServiceNow Reports & Dashboards**<br>(Request Tracking / SLA Performance) | | | |
