Project Design Phase-II
Data Flow Diagram & User Stories

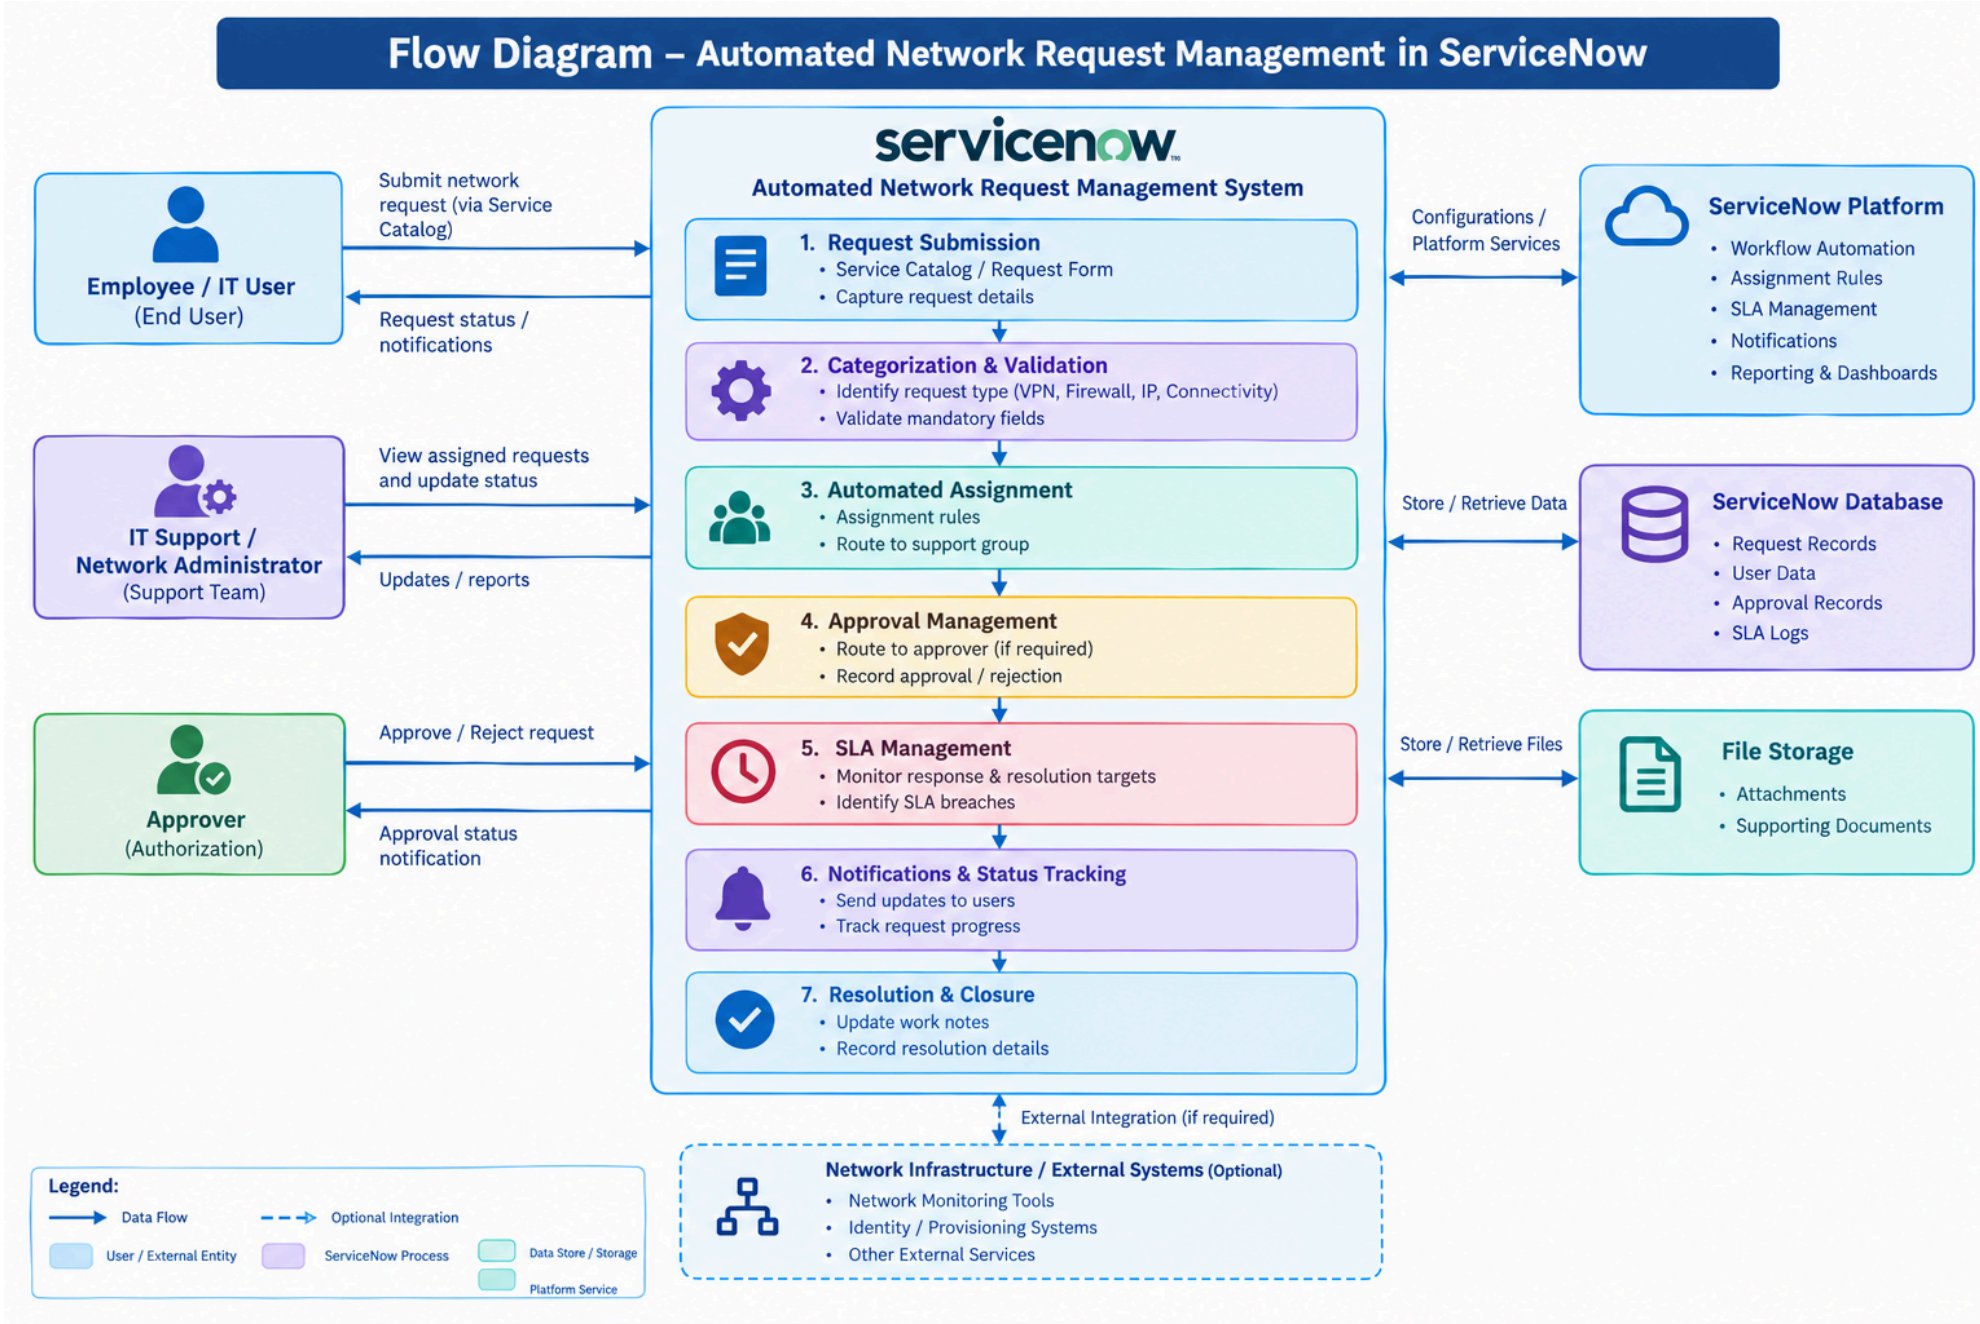

Date	26 September 2026
Team ID	
Project Name	Automated Network Request Management in ServiceNow
Maximum Marks	4 Marks

Data Flow Diagrams:

A Data Flow Diagram (DFD) is a graphical representation of how data enters a system, moves through different processes, and is stored or delivered to users.

For the Automated Network Request Management in ServiceNow project, the DFD illustrates how employees submit network requests, how ServiceNow categorizes and assigns them, how approval and SLA processes are handled, and how request updates are communicated to users.

Flow Diagram – Automated Network Request Management in ServiceNow

User Stories

Use the below template to list all the user stories for the product.

User Type	Functional Requirement (Epic)	User Story Number	User Story / Task	Acceptance criteria	Priority	Release
Employee (End User)	Network Request Submission	USN-1	As an employee, I can submit a network request through the ServiceNow Service Catalog by entering the required details.	The request is created successfully with the required information.	High	Sprint-1
Employee (End User)	Request Tracking	USN-2	As an employee, I can view the status of my submitted network request.	The current request status is visible to the user.	High	Sprint-1
Employee (End User)	Notifications	USN-3	As an employee, I receive notifications about request submission, approval, progress, and closure.	Notifications are triggered for the configured request events.	Medium	Sprint-2
IT Support / Network Administrator	Request Categorization	USN-4	As an IT support member, I can categorize network requests by type, such as VPN, firewall, IP allocation, or connectivity.	The request category is recorded correctly.	Medium	Sprint-1
IT Support / Network Administrator	Automated Assignment	USN-5	As an IT support member, I can have requests assigned to the appropriate support group based on configured rules.	Requests are routed according to the configured assignment conditions.	High	Sprint-1
Approver	Approval Management	US-6	As an approver, I can review, approve, or reject network requests that require	The approval decision is recorded and the workflow	High	Sprint-2

			authorization.	updates accordingly.		
IT Support / Network Administrator	SLA Management	US-7	As an IT support member, I can monitor request response and resolution targets.	Configured SLA timers and breach indicators work as expected.	High	Sprint-2
Manager / Administrator r	Reporting and Dashboards	US-8	As a manager, I can view reports about request volume, status, workload, and SLA performance.	Reports display accurate data for the selected criteria.	Medium	Sprint-3
IT Support / Network Administrator	Request Resolution	US-9	As an IT support member, I can update work notes, enter resolution details, and close completed requests.	Resolution details are saved and the request status is updated.	High	Sprint-2
